

Manufacturing Batch-to-Batch Reproducibility (UK-C8)

Excellent Reproducibility with 3µm C8 Packing Material ... Unison UK-C8

Unison UK-C8, 75 x 4.6 mm
20mM ammonium acetate / ACN = 64/36
1.0 mL/min, 37 °C, 254 nm

This data shows the exceptional batch-to-batch reproducibility for Unison UK-C8, a column packed with high-efficiency 3µm C8.

The Unison series packing material is manufactured in a proprietary manner different from conventional methods. This development was completed to not only achieve high-efficiency packing material but also to provide high levels of batch-to-batch reproducibility.

We put great consideration and time into our manufacturing in order to provide users with the highest levels of product quality.
